

Mods(marked in green):

- 1. Updated hole sizes, all holes are clearance holes.
- 2. Instead of holes on the top, we are going with M6 holes with channels cut to the edge.
- 3. The length of the 2 wings has been extended by a few mm (42 --> 46 mm).
- 4. The bottom foling portion has been made wider (40mm) to accomodate a larger circular hole.
- 5. The length of the long folding flaps (142 mm) dooes not have to be accurate, so cuts can be placed such that its size is reduced.
